'Intelligent Simplification of Direct Composites Techniques for Predictability, Esthetics & Profitability'

In the past several years there have been improvements in composite and adhesion technologies. These new technologies enable clinicians to place the majority of their

direct composites with a simplified bonding and composite technique.

Techniques will be presented, demonstrated, and practiced to restore a Class II and a Class IV restoration in this HANDS-ON course using step-by-step clinical procedures.

Subjects discussed will include a wide range of direct resin uses, including predictable shade selection, simplified preparations, natural layering, multiple contact predictability and efficient finishing and polishing. Procedures reviewed will also include preventing post-operative sensitivity, flowable resin use, mixed media cases, indirect restoration blackout, previsualization, mockups, repairs/renewals, photography, and advanced aesthetics.

From those just starting to place direct resins to clinicians seeking advanced European artistry, valuable and practical direct resin pearls and composite gems gleaned from across the globe will be shared with attendees. Come discover new avenues to market your practice and attract an untapped cosmetic patient base and jump start your practice Monday morning! Attendee: Please bring loupes for the hands-on portion.

Learning Objectives:

- Discover a simplified shade mapping system to efficiently choose the value, shade and surface

- characteristics of any resin restoration
- Learn the benefits of direct resin restorations over other alternatives and discover the advantages of new resin materials
- Understand techniques to simplify layering and achieve natural polychromicity in as little as two shades
- Eliminate post-op sensitivity easily and predictably
- Efficiently and predictably restore multiple Class-II posterior composites and a Class-IV anterior
- Simplified placement, finishing and polishing techniques

Dr. Michael Morgan, has over 25 years of teaching and 37 years of practice. Often referred to by his colleagues as “the Michelangelo of dentistry,” Dr. Michael Morgan is equal parts artist, pioneer, and guide. After dental school, Dr. Morgan embraced the challenging field of direct composite restorations and aesthetic dentistry. While studying in Switzerland under the tutelage of the world’s most skilled dental artists, Dr. Morgan began developing the comprehensive, cutting-edge philosophy that guides his work today.

In his thriving practice in Hinsdale, Illinois, Dr. Morgan synthesizes the venerable tradition of conservative dentistry, innovative materials, advanced techniques, and digital photography to establish doctor-patient partnerships that achieve life-altering aesthetic goals.
